

GLOBAL VISION. PERSONAL FOCUS.

## Attorney Referrals

There are many reasons why an attorney might look through the Internet for another qualified attorney to handle a case that is sitting on his or her desk. It might be that you know a lot about personal injury claims but not a lot about cases involving intellectual property, international business or commercial litigation. Maybe you know enough about the whole thing to know you do not have the time or the resources to devote to learning enough about the subject to be an effective advocate for your client.

Whatever the reason, we are glad you have stopped to look at our firm.

Here at Simmons Cooper LLC, our expertise is diverse, and our resources are comprehensive. We have invested years developing the information needed to try cases involving mesothelioma asbestos lawsuits, business disputes and intellectual property, defective drugs and devices, benzene exposure, and qui tam claims.

We have spent years researching, talking to countless experts, and creating a network of knowledge that gives our clients the comprehensive resources they deserve. We have access to financial accountants and have attorneys who are familiar with non-court arenas, like the NASD and the rules it imposes on its members.

To refer a case to our office, you may contact us at 1-866-468-8631 or send us a message online and someone will contact you, the affected business, or the injured person, as you prefer. We will make every effort to work with you to provide your client with quality legal representation on matters ranging from commercial litigation to mesothelioma asbestos lawsuits.
